Marathon's gravity fed units are capable of heating, melting and dispensing hot applied rubberized material for crack sealing, waterproofing, and roofing. Available as one single fuel source, making them more efficient and economical to run.

FEATURES

- Manufactured with minimum 10 GA steel, fully welded and constructed of heavy duty channel and gusseted in locations for safety and strength.
- Heavy duty oil and material vats and insulated firing chamber provide optimum fuel economy.
- Full sweep, reciprocating, non-jamming agitation is hydraulically driven by a 6hp Kubota diesel engine.
- Diesel burner controlled by a digital Automatic Control System that controls oil and sealant temperatures.
- Easy to read rear mounted material and oil bi-metal thermometers are reliable and accurate requiring no electricity or wiring.
- Reverse loading material lids provide safe, anti-splash loading of material.
- Low center of gravity for safe towing, superior rear visibility and ease of operation.
- 2" material dispensing valve at rear of unit.
- 120V 1,500W Overnight heater(s) maintain heat to reduce daily start-up time.
